

CORRIGENDUM

The article 'Role of *Lipistat* in protection, against isoproterenol induced myocardial necrosis in rats: a biochemical and histopathological study' by Seth SD, Maulik M, Katiyar CK & Maulik SK (*Indian J Physiol Pharmacol* 1998; 42(1): 101-106) uses the name "Lipistat" for an experimental multi-ingredient herbal formulation. It has since come to our notice that "Lipistat" is also the brand name of one preparation of "Lovastatin". In view of this ambiguity, the Editorial Board has decided to withdraw the publication of the article.
